

YKI-0030

IN THE SPECIFICATION:

Please accept the following specification paragraph in re-written "clean form."

---

The following paragraph replaces the paragraph extending from page 11, line 23 to page 12, line 4:

-- In the organic EL display device, as shown in Fig. 7, an insulator substrate 100 is provided with a peripheral drive circuit 251 including horizontal drive circuit 120 and vertical drive circuits 101 configured using third TFTs. Also formed on the insulator substrate 100 is a display pixel region 200 including display pixels of the organic EL display. The third TFTs are formed within the peripheral drive circuit region. Each vertical drive circuit 101 includes a vertical shift register (V-SR) 102 and a buffer circuit 103. A horizontal drive circuit 120 includes a horizontal shift register (H-SR) 104, a buffer 105, and a source line switch 106. --
